Prospective purchasers of Certificates should ensure that they understand the nature of the Certificates and the extent of their exposure to risks and that they consider the suitability of the relevant Certificates as an investment in the light of their own circumstances and financial condition. In particular, the Certificates have not been, and will not be, registered under the United States Securities Act of 1933, as amended (the "Securities Act"), or any state securities laws and trading in the Certificates has not been approved by the Commodity Futures Trading Commission under the United States Commodity Exchange Act, as amended. Neither the Issuer nor the Guarantor has registered as an investment company pursuant to the United States Investment Company Act of 1940, as amended (the "Investment Company Act"). 2. Summary of Risk Factors

Risk factors relating to the Issuer and Guarantor:

There are certain factors that may affect the Issuer's and the Guarantor's ability to fulfil their obligations under the Certificates. These include the following risk factors related to the Bank and its industry:

- (i) Nine main categories of risks are inherent in the Bank's activities:
 - Credit and counterparty risk;
 - Market risk;
 - Operational risk;
 - Asset-liability management risk;
 - Refinancing (liquidity) risk;
 - Insurance subscription risk;
 - Breakeven risk;
 - Strategy risk; and
 - Concentration risk.
- (ii) Deteriorating economic conditions have adversely affected the Bank's industry and the Bank's results and could, in the future,

have a material adverse effect on the Bank's liquidity, earnings and financial condition.

- (iii) There can be no assurance that legislative action and other measures taken by governments and regulators in France or globally will fully and promptly stabilise the financial system, and the Bank and its shareholders may be adversely affected by measures taken in connection with such legislation.
- (iv) The Bank may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
- (v) The Bank may generate lower revenues from brokerage and other commission and fee-based businesses during market downturns.
- (vi) Protracted market declines can reduce liquidity in the markets, making it harder to sell assets and possibly leading to material losses.
- (vii) The soundness and conduct of other financial institutions and market participants could adversely affect the bank
- (viii) Significant interest rate changes could adversely affect the Bank's net banking income or profitability.
- (ix) Primary and secondary debt market conditions and deteriorating economic conditions could have a material adverse impact on the Bank's earnings and financial condition.
- (x) A substantial increase in new provisions or a shortfall in the level of previously recorded provisions could adversely affect the Bank's results of operations and financial condition.
- (xi) The Bank's competitive position could be harmed if its reputation is damaged.
- (xii) An interruption in or a breach of the Bank's information systems may result in lost business and other losses.
- (xiii) Unforeseen external events can interrupt the Bank's operations and cause substantial losses and additional costs.
- (xiv) The Bank is subject to extensive supervisory and regulatory regimes in the countries in which it operates.
- (xv) Notwithstanding the Bank's risk management policies, procedures and methods, it could still be exposed to unidentified or unanticipated risks, which could lead to material losses.
- (xvi) The Bank's hedging strategies may not prevent losses.
- (xvii) The Bank may have difficulty in identifying and executing acquisitions, which could materially harm the Bank's results of operations.
- (xviii) Intense competition, especially in the Bank's home market of

France, where it has the largest single concentration of its businesses, could adversely affect the Bank's net banking income and profitability.

- (xix) The Bank's external growth policy carries certain risks, particularly with respect to the integration of acquired entities, and the Bank may be unable to realise the benefits expected from its acquisitions.

The following risk factors relate to BNPP B.V.: BNPP B.V. is not an operating company. BNPP B.V.'s sole business is the raising and borrowing of money by issuing securities or other obligations. BNPP B.V. has, and will have, no assets other than OTC contracts, cash and fees payable to it, or other assets acquired by it, in each case in connection with the issue of securities or entry into other obligations relating to the Programme from time to time. The net proceeds from each issue of securities issued by the Issuer will become part of the general funds of BNPP B.V. BNPP B.V. may use such proceeds to maintain positions in options or futures contracts or other hedging instruments ("**Hedging Agreements**"). The ability of BNPP B.V. to meet its obligations under the Certificates will depend on the receipt by it of payments under the relevant Hedging Agreements. Consequently, BNPP B.V. is exposed to the ability of counterparties in respect of such Hedging Agreements to perform their obligations under such Hedging Agreements.

Risk factors relating to the Certificates:

There are certain factors which are material for the purpose of assessing the market risks associated with the Certificates such as the value of the Underlying Index, the creditworthiness of Barclays Bank PLC (which may in turn be affected by economic, financial and political event in one or more jurisdictions), volatility, secondary market liquidity and conflicts of interest. These and other factors are interrelated in complex ways, and as a result, the effect of any one factor may be offset or magnified by the effect of another factor. A relatively small movement in the Underlying Index can result in a disproportionately large movement in the price of the Certificates. Following a Credit Event, the Certificates may be redeemed earlier than the Scheduled Redemption Date. In certain circumstances following a Credit Event, the Certificates may not be redeemed for up to 24 months following the date on which the Calculation Agent gives notice to the Issuer that a Credit Event has occurred.

Other the risks related to the Certificates issued under the Programme, including the following:

- (i) High degree of risk: The Certificates involve a high degree of risk, which may include, among others, credit, interest rate, foreign exchange, time value and political risks. Prospective purchasers of Certificates should recognise that their Certificates may be redeemed for less than the value of their initial investment.
- (ii) Certificates are unsecured obligations: The Certificates are

unsubordinated and unsecured obligations of the Issuer and will rank *pari passu* with themselves. The obligations of the Guarantor under the Guarantee are unsubordinated and unsecured obligations of the Guarantor and will rank *pari passu* with all its other present and future unsubordinated and unsecured obligations, subject as may from time to time be mandatory under French law.

- (iii) Possible illiquidity of the Certificates in the secondary market: It is not possible to predict the price at which Certificates will trade in the secondary market and/or whether the Certificates will be liquid in the secondary market.
- (iv) Potential conflicts of interest: Potential conflicts of interest may exist between the Calculation Agent (being an affiliate of the Issuer) and Holders of the Certificates, including with respect to certain determinations and judgments that the Calculation Agent must make.

See "*Risk Factors*" on page 12 of this Prospectus for further details.

Calculation Agent BNP Paribas Arbitrage S.N.C.

Principal Certificate Agent BNP Paribas Arbitrage S.N.C.

Automatic Early Redemption Provided that no Credit Event has occurred, if, on one of the Automatic Early Redemption Valuation Dates, the Settlement Price of the Underlying Index is equal to or greater than Settlement Price of the Underlying Index on the Strike Date, then the Issuer shall redeem each Certificate on the relevant Automatic Early Redemption Date at the Automatic Early Redemption Amount.

The Automatic Early Redemption Amount shall be calculated as follows:

$$NA \times (100\% + \sum_{i=1}^n \text{Coupon}_i)$$

where *NA* is the Notional Amount of each Certificate (equal to EUR 1,000), *n* represents the value (1, 2, 3, 4, 5) associated with the relevant Automatic Early Redemption Date and Automatic Early Redemption Valuation Date, and *Coupon_i* is two per cent.

The Automatic Early Redemption Valuation Dates are 31 March 2010 (*n=1*), 30 June 2010 (*n=2*), 30 September 2010 (*n=3*), 31 December 2010 (*n=4*) and 31 March 2011 (*n=5*).

If on an Automatic Early Redemption Valuation Date, the Settlement Price of the Underlying Index is equal to, or greater than, 70 per cent. of the Settlement Price of the Underlying Index on the Strike Date, a Coupon will be calculated in respect of each Certificate equal to two per cent. 2011).

Provided that no Credit Event has occurred (as described in Credit-Linked Provisions below), the Cash Settlement Amount of each Certificate on the Scheduled Redemption Date shall be calculated as follows:

- (i) if, on the Valuation Date, the Settlement Price of the Underlying Index is equal to, or greater than, 70 per cent. of the Settlement Price of the Underlying Index on the Strike Date (as defined below), the Cash Settlement Amount of each Certificate shall be equal to the Notional Amount of each Certificate multiplied by the aggregate of (i) 102 per cent and (ii) two per cent multiplied by the number of Automatic Early Redemption Valuation Dates where a Coupon was calculated; or
- (ii) if, on the Valuation Date, the Settlement Price of the Underlying Index is below 70 per cent. of the Settlement Price of the Underlying Index on the Strike Date, the Cash Settlement Amount of each Certificate shall be equal to the product of the Notional Amount and the aggregate of (i) 100 per cent. of the Notional Amount of each Certificate and (ii) two per cent multiplied by the number of Automatic Early Redemption Valuation Dates where a Coupon was calculated, less (iii) a percentage equal to the percentage decrease between the Settlement Price of the Underlying Index on the Valuation Date and the Settlement Price of the Underlying Index on the Strike Date.

Credit-Linked Provisions

In the event that a Failure to Pay occurs in respect of the Reference Obligation or a Bankruptcy occurs in respect of Barclays Bank PLC, and the Issuer determines that the same constitutes a Credit Event, then the Issuer shall notify the Holders through the relevant Clearing Systems and the Calculation Agent shall determine a recovery rate in respect of the Reference Obligation to determine a cash settlement amount per Certificate as follows:

EUR 1,000 x (Certificate Value - Redemption Adjustment)

where the Certificate Value will be the fair market value of the Certificate (as determined by the Calculation Agent) expressed as a percentage of the Notional Amount without reference to any Credit-Linked Provisions and the Redemption Adjustment means the aggregate of any costs payable by the Hedge Counterparty (or the Issuer or any of its affiliates) expressed as a percentage of the Notional Amount to unwind or terminate any hedging transaction or hedging positions related to the Certificates and an amount equal to the amount of the Deposit not recovered by the Hedge Counterparty upon the liquidation of the Reference Obligation or the sale by the Hedge Counterparty of its rights in respect of the deposit.

Governing Law

The Certificates and the Guarantee will be governed by French law.

RISK FACTORS

Prospective investors should read those sections of the Base Prospectus incorporated by reference into this Prospectus and the Supplements together with this Prospectus.

The purchase of Certificates involves substantial risks and is suitable only for investors who have the knowledge and experience in financial and business matters necessary to enable them to evaluate the risks and the merits of an investment in the Certificates. Before making an investment decision, prospective purchasers of Certificates should ensure that they understand the nature of the Certificates and the extent of their exposure to risks and that they consider carefully, in the light of their own financial circumstances, financial condition and investment objectives, all the information set forth in the Base Prospectus (including "Risk Factors" on pages 17 to 33 thereof) and this Prospectus.

ADDITIONAL RISK FACTORS RELATING TO THE CERTIFICATES

The Certificates are linked to the Underlying Index and to the creditworthiness of Barclays Bank PLC. An investment in the Certificates involves a high degree of risk. The Certificates are of a specialist nature and should only be bought and traded by investors who are particularly knowledgeable in investment matters.

An investment in the Certificates will entail significant risks not associated with an investment in a conventional debt security. The value of the Underlying Index will determine whether an Automatic Early Redemption will occur on any Automatic Early Redemption Valuation Date (assuming no Credit Event has occurred). On the Scheduled Redemption Date, assuming no Credit Event has occurred and the Certificates have not been otherwise redeemed or cancelled prior to that date, Holders will receive the Notional Amount of their Certificates plus an amount (if any) determined by reference to the performance of the Underlying Index on each Automatic Early Redemption Valuation Date since the Strike Date plus two per cent provided that if the Settlement Price of the Underlying Index on the Valuation Date is equal to, or below, 70 per cent. of the Settlement Price of the Underlying Index on the Strike Date, a Holder may recover less than its initial investment. There can be no assurance as to the performance (future or otherwise) of the Underlying Index.

Unless previously redeemed (and provided that no Credit Event has occurred) the Scheduled Redemption Date in respect of the Certificates is scheduled to fall on 15 July 2011. Following payment of the Cash Settlement Amount (if any) in respect of that the Issuer shall have discharged its obligations in respect of the Certificates and have shall have no other liability or obligation whatsoever in respect thereof.

An investor may recover less than their initial investment if their Certificates are sold before maturity, irrespective of the performance of the Underlying Index.

Market values may be affected by, amongst other factors, movements in the level of the Underlying Index, volatility, and interest rates. These and other factors are interrelated in complex ways, and as a result, the effect of any one factor may be offset or magnified by the effect of another factor. A relatively small movement in the Underlying Index can result in a disproportionately large movement in the price of the Certificates. It is not possible to predict the price at which the Certificates will trade in the secondary market, and/or whether the Certificates will be liquid in the secondary market.

The Certificates are linked to the creditworthiness of Barclays Bank PLC. If Barclays Bank PLC suffers a Bankruptcy or a Failure to Pay, investors may receive little or none of their initial investment on redemption. Following a Credit Event, the Certificates may be redeemed earlier or later than the Scheduled Redemption Date. Neither the Issuer or any of its affiliates, the Manager nor the Guarantor makes any representation as to the credit quality of the Reference Obligation or Barclays Bank PLC. Neither the Issuer or any of its affiliates, the Manager nor the Guarantor is under any obligation to make available any information relating to, or keep under review on the Holders' behalf, the business, financial conditions, prospects, creditworthiness or status of affairs of Barclays Bank PLC or conduct any investigation or due diligence into Barclays Bank PLC.

The price of the Certificates may be volatile and will be affected by, amongst other things, the time remaining to the redemption date and the performance of the Underlying Index.

The Certificates are unsubordinated and unsecured obligations of the Issuer and will rank *pari passu* with themselves. The obligations of the Guarantor under the Guarantee are unsubordinated and unsecured obligations of the Guarantor and will rank *pari passu* with all its other present and future unsubordinated and unsecured obligations, subject as may from time to time be mandatory under French law.

The Certificates are Index Linked Certificates, as defined in the Base Prospectus.

Risks relating to deposits

The Hedge Counterparty will deposit cash equal to 100 per cent. of the Placed Notional in a sight deposit account in its name opened with Barclays Bank PLC. Where a Credit Event occurs with respect to Barclays Bank PLC, the amount which is paid in respect of the Certificates will depend on both the fair market value of the Certificate (determined by the Calculation Agent without taking into account its credit linked provisions) and the amount which is either recovered from the Reference Entity in respect of the Deposit or alternatively the amount which is received by the Hedge Counterparty from a third party in respect of the Hedge Counterparty's rights in respect of the deposit.

Potential conflicts of interest

Because the Calculation Agent is an affiliate of the Issuer, potential conflicts of interest may exist between the Calculation Agent and Holders of the Certificates, including with respect to certain determinations and judgments that the Calculation Agent must make. The Calculation Agent is obliged to carry out its duties and functions as Calculation Agent using its reasonable judgment. Furthermore, the Calculation Agent will not act as a fiduciary or as an advisor to the Holders in respect of its duties as Calculation Agent.

The Distributor (as defined at paragraph 8 of "*Other Information*" below) will receive from the Manager a fee equal to a maximum annual amount of 1.03 per cent. of the Issue Amount.

The Issuer, the Guarantor, the Calculation Agent, the Hedge Counterparty and their affiliates may engage in trading activities (including hedging activities) in instruments or derivative products based on or related to the Reference Entity for their proprietary accounts or for other accounts under their management.
