Under these Notes, the Noteholders are not entitled to receive any coupons during the term of the Notes. The Notes contain an early redemption feature which could prevent the Noteholders from receiving the entire performance of the Underlying above a certain threshold: if the Underlying reaches such threshold, the Notes will be early redeemed.

On the Maturity Date, the Final Redemption Amount payable to the Noteholders shall depend on the performance of the Underlying(s).

Under these Notes, at maturity, the Noteholders are entitled to receive a Final Redemption Amount which may, in case of an adverse evolution of the Underlying(s) during the term of the Notes, be significantly lower than the amount initially invested.

The Notes are not capital guaranteed. In a worse case scenario, investors could sustain an entire loss of their investment and should therefore reach an investment decision on this product only after careful consideration with their own advisers as to the suitability of this product in light of their particular financial circumstances.

Pursuant to the provisions of the Equity Technical Annex, upon the occurrence of certain Extraordinary Events and Adjustments affecting the Underlying(s), the Calculation Agent may decide an Early Redemption of the Notes on the basis of Market Value.
